CAREER OBJECTIVE

Dedicated Software Developer with hands-on experience in designing, coding, and testing software solutions. Aiming to secure a challenging role where I can utilize my expertise in React/Tailwind/Nest.js to deliver high-quality code and drive business value.

EDUCATION

SaiGon University (SGU)

Information Technology

2021 - 2026

- Engineer's Degree in Information Technology
- **Relevant Coursework:** React JS (almost using Java Script), Java, MySQL, Mongo DB

EXPERIENCE

CASUMINA Industrial Joint Stock Co., Ltd.

Jun 2025 – Aug 2025

Software Engineer Intern • Ho Chi Minh City, Vietnam

- Research and analyze business requirements for a corporate digital approval system.
- Design and develop a form approval application based on analyzed business workflows, utilizing a tech stack that includes React, Next.js, and MongoDB.
- Plan and schedule project timelines, deliver presentations, and provide weekly progress reports.

LACTY Co., Ltd.

Dec 2025 - Jun 2026

Software Developer • Ho Chi Minh City, Vietnam

- Gather requirements, analyze, and build internal management systems for the company.
- Maintain systems to ensure high stability, availability, and optimal performance.
- Receive user requests and modify the system to meet changing user requirements.

PROJECTS

Digital Enterprise — Form Approval System

Jun 2025 - Aug 2025

React JS · Next.js · Tailwind · Shadcn UI · Typescript · MongoDB

This project is a web-based application developed as part of an internship at CASUMINA. The system digitizes internal business processes, focusing on form management, approval workflows, user management, and notifications. It streamlines the handling of various internal forms such as meeting room bookings, payment requests, business trip registrations, salary adjustments, IT equipment requests, and recruitment proposals.

- The application supports form creation, submission, multi-level approvals, role-based access control (RBAC), real-time notifications (in-app and email), and activity logging.
- It was designed to improve operational efficiency by replacing manual paper-based processes with a digital platform.
- Solo project — independently designed architecture, built all modules, and deployed the full-stack application.
- **GitHub:** github.com/tandat0303/EnterpriseSystem

Expat Manager Leave Calendar — Leave Management System

Jan 2026 – Feb 2026

React JS · Antd · Tailwind · Typescript

A modern Schedule Management Web Application built with React, TypeScript, and Vite, designed to provide a fast and interactive interface for managing events, tasks, and daily planning. The project focuses on clean architecture, performance optimization, and scalable frontend structure for building advanced calendar-based systems.

- **GitHub:** github.com/tandat0303/ScheduleApp

IT Project Tracking — Project Management System

May 2026 - Jun 2026

React JS · Tailwind · Typescript · Socket.io · Nest.js · SQL Server

An internal management system designed to track, monitor, and evaluate the progress and outcomes of IT projects and individual tasks. The system serves as a core platform for assessing employee performance and productivity within the IT department.

- Implemented Role-Based Access Control (RBAC) (Admin/User) to secure sensitive report data and restrict privileged operations.
- Built a real-time notification feature to alert users instantly regarding project deadline update requests.
- Developed core CRUD functionalities along with advanced modules: activity logging (audit trails), Excel export/import, and reporting dashboards.
- **GitHub:** github.com/tandat0303/IT-Project-Management

SKILLS

Technical Skills

- Programming Languages: TypeScript, JavaScript, Java
- Frameworks & Libraries: React JS, Tailwindcss, Nest JS
- Research: AI tool evaluation, performance analysis, indoor positioning systems
- Developer Tools: Git, VS Code, Postman, SQL Server

Soft Skills

- Problem Solving, Project Management, Adaptability

Language

- English: Immediate

CERTIFICATES

- IELTS Academic: 6.0 Overall | IDP (Certificated: March 2024)
